A long term multiple recapture of a barramundi that was tagged at the barrage on the Fitzroy River. It was recaptured at the barrage in 1994 and released on the freshwater side. It was recapture again below the barrage in 1997. It was finally recaptured down river in Casuarina Creek by a commercial fisher and was reported from a shop that received the fish. The fish was out for a total of 3488 days or 9.5 yrs. Details of this recapture have only just been received.
