There is nothing significant in this recapture other than the circumstances. Norm caught this barra on a yabby. As he wasn't really expecting to hook such a fish he was having some trouble landing it. He asked for assistance from another angler that was lure fishing nearby. The fish was duly landed and the tag discovered. It just so happened that the angler who helped Norm land his fish tagged the fish a year ago. Tim was able to provide Norm the tag details on the spot.
