Bulletin 184

Lake Theresa on Theresa Creek near Clermont where Barramundi were stocked in 2007

Tag details		Recapture details
Tag	T14928	
Species	Barramundi (<i>Lates calcarifer</i>)	
Date	10/11/2007	2/2/2012
Length	-	850mm
Location	Lake Theresa	Wiggins Island
Fisher	Clermont FSG	Johnny Mitchell
Days Out	1545 (4.2 years)	
Growth	Not available	
Movement	850km down river over 6 weirs and south through Narrows	
Released	Yes	

In 2007 there was a batch of 848 tagged fish stocked into Lake Theresa. In February 2010 the first of these fish was recaptured in the Fitzroy estuary. Since then there have been 33 recaptures in the estuary and beyond (700-850km downstream). That is an impressive 3.9% of all fish from that batch. This latest recapture shows the powerful urge and tenacity of these fish to get to the estuary.
