8 February 2013

Bulletin 195

Three recaptures of tagged Barramundi were made by the same fisher within 5 days, all in different locations. All fish had been at liberty for over 4 years. Two had moved south while the other had moved north.

New Tagging Awards certificates are on the way. Taggers who are registered with Suntag Online will be able to print their own certificates. This will include printing old awards where the certificate was not received, has been lost or damaged. New certificates will be available for Achievement, Excellence and Frequent Tagger awards.
